

SEASONAL LIVING

Breathtaking Outdoors. Inspiring Indoors.

AUSTIN
OUTDOOR COLLECTION

PRODUCT CARE INFORMATION
UPDATED JANUARY 2016

**WE STRONGLY RECOMMEND USE OF HIGH QUALITY FURNITURE
COVERS**

The Austin Outdoor Collection by Seasonal Living® is designed for Outdoor Use. Following the Product Care Guidelines will help to prolong the life of your outdoor furniture and help to maintain your furniture to look great all the time. This outdoor furniture collection is comprised of the following materials:

- 1. A clear powder coated mirrored / polished stainless steel frame**
- 2. The furniture frame is upholstered with a combination of Fast Dry Foam and an outdoor vinyl (“leather”) upholstery designed for full outdoor use. The synthetic leather vinyl upholstery is hand-stitched using UV-resistant sewing threads for longer-durability and suitability for outdoor usage.**
- 3. The Cushions are comprised of 2 core elements: Urcel’s® Quick Dry Foam and Sunbrella® fabric cushion covers**

CARE OF THE CLEAR POWDER COATED STAINLESS STEEL FRAME

The stainless steel powder coated frame requires minimal care. We recommend using clean water and a soft sponge with mild detergent (DO NOT use any abrasive or corrosive cleaners as this may damage the powder coating).

Do NOT leave stainless steel furniture where it would be in direct regular contact with salt water.

CARE OF OUTDOOR VINYL (GREY LEATHER LIKE UPHOLSTERY).

Cleaning and Care of Outdoor Vinyl Upholstery

- Wash with mild soap and water (diluted commercial dishwashing liquid)
- No cleaning products with organic solvents
- Rinse with clear water
- Gently dry with a soft, clean cloth
- No further maintenance required
- We recommend that you do not sit on top of the upholstery arms or backs of the Austin sectional – doing so may (over time) cause the foam and upholstery to create depressions / Flatten from body weight
- Do not place any unnecessary pressure against the vinyl upholstery as this may stretch the upholstery

CARE OF URECEL'S QUICK DRY FOAM CUSHION FOAM

The inside that's unbeatable outside for lounging on the deck of a luxury yacht or sitting by the pool or ocean – you will be relaxing on cushions that are made from Urecel Quickdry foam. This foam is a high-performance product engineered specifically for outdoor applications. This product is the first choice of top-end designers because it's simply the best there is. Watch this YouTube video to understand how this product outperforms all other foam for outdoor seating.

<http://www.youtube.com/watch?v=8E5gRt55iTQ>

- Urecel Quickdry Foam Features: A cushion that you can leave outdoors – snow, rain or shine with minimal maintenance
- Reticulated foam which has open cells / pores which permit maximum water drainage and air circulation, allowing quick usage after being wet or even saturated with rain water
- In-built antimicrobial protection from UreGard, which will inhibit the growth of common molds and fungus inside outdoor cushion covers
- No need to unzip cushion covers to permit water drainage

- Accelerated drying time
- From heavy water saturation to completely dry in 3 hours or less
- Retains shape and color
- NO specific care day-to-day care required.
- Available in different levels of firmness

CARE OF SUNBRELLA® CUSHION COVERS

Sunbrella® is a 100% solution-dyed acrylic fabric manufactured by Glen Raven Mills. Sunbrella fabrics are highly regarded as the premier outdoor fabric in the world and are the recognized leader in the outdoor furniture industry.

One of the best ways to keep Sunbrella fabrics looking good and to delay deep or vigorous cleaning is to properly maintain the fabrics. This can be accomplished by simply brushing off dirt before it becomes embedded in the fabrics, wiping up spills as soon as they occur or spot cleaning soon after stains occur.

For more information on Sunbrella fabric care watch this YouTube video:

http://www.sunbrella.com/en_us/how/cleaning/

Many stains can be removed from Sunbrella fabric with mild soap and lukewarm water. First blot the excess stain residue. Mix mild soap and lukewarm water and remove the stain with a sponge or soft bristle brush. Be sure to rinse thoroughly to remove all soap residue and then allow the fabric to air-dry.

If the stain is still visible, blot excess stain residue. Mix 1 cup of bleach and ¼ cup of mild soap per gallon of lukewarm water and remove the stain with a sponge or soft bristle brush. Rinse thoroughly and allow to air-dry.

General or light cleaning

1. Brush off any loose dirt.
2. Prepare a cleaning solution of 1/4 cup mild soap, such as Woolite or Dawn dishwashing liquid, per gallon of lukewarm water.
3. Use a sponge or a soft bristle brush to clean.
4. Allow cleaning solution to soak into fabric.
5. Rinse thoroughly to remove all soap residue.
6. Allow fabric to air dry.

Spot cleaning

1. Apply a light mist of mild soap and water using a spray bottle.
2. Work the solution into the stain by lightly scrubbing the area with a sponge or very soft bristle brush.
3. Rinse thoroughly to remove all soap residue.
4. Blot excess moisture with a clean, soft towel or sponge.

5. Wet-vacuum or blot excess water.
6. Air dry. Repeat steps 3 and 4 until all soap residue is removed.

For removable Sunbrella fabric

Hand washing

1. Soak fabric in a solution of 1/4 cup mild soap per gallon of lukewarm water.
2. Use a sponge or a soft bristle brush as necessary.
3. Rinse thoroughly to remove all soap residue.
4. Air dry.

Machine washing

Machine wash in cold water. Depending on wash load size, use normal amounts of mild laundry detergent and add 1 cup of bleach. Allow fabric to air dry. DO NOT place Sunbrella fabrics in drying machines.

Heavy cleaning for stubborn stains and mildew

Sunbrella fabric does not promote mildew growth, however, mildew may grow on dirt and other foreign substances that are not removed from the fabric. To clean stubborn stains:

1. Prepare a solution of 1 cup of bleach and 1/4 cup mild soap per gallon of water.
2. Spray on entire area and allow to soak into the fabric for 15 minutes.
3. Remove stain with a sponge, clean towel or very soft bristle brush.
4. Rinse thoroughly to remove all soap residue.
5. Allow fabric to air dry.
6. If stain and/or mildew are severe, bleach quantities may be increased.
View the Sunbrella stain chart -
http://www.sunbrella.com/en_us/how/cleaning/stain-chart.php for removal of specific stains.

Re-treating the fabric for ease of cleaning

As part of the finishing process, Sunbrella fabrics are treated with a fluorocarbon finish, which enhances water repellency. This finish is designed to last for several years, but must be replenished after a thorough cleaning. Based on test results, Glen Raven recommends 303 Fabric Guard™ as the preferred re-treatment product for Sunbrella fabrics. Fabrics should be re-treated after thorough cleaning or after five years of use.

Applying 303 Fabric Guard™

303 should be applied to Sunbrella fabrics after each thorough cleaning, which typically removes the original finish and reduces the fabric's water repellency.

1. Clean Sunbrella fabric, using one of the cleaning methods.
2. Allow Sunbrella to completely air dry.
3. Apply 303 Fabric Guard in a well-ventilated area following instructions on the container.
4. Apply 303 in a thin, even coat and allow fabric to dry completely.
5. Apply a second thin, even coating of 303. (Two light coatings are more effective in restoring fabric water resistance than a single heavy coating.)

Note: A 15-ounce bottle provides coverage of up to 50 square feet of fabric.

For more information, visit www.303products.com to learn more about Fabricguard

Professional cleaners

In evaluating the services of a professional firm, you should inquire about the firm's experience in working with Sunbrella fabrics and knowledge of cleaning and re-treatment requirements.

DO NOT dry clean Sunbrella fabrics.

Helpful hints

Protect the area around your Sunbrella fabric when using a bleach solution – bleach may discolor non-Sunbrella fabrics. Always rinse Sunbrella thoroughly to completely remove bleach.

Please be aware of the environment when cleaning with bleach. Bleach can have harmful effects on the natural environment around you. We do not advise using bleach if you are surrounded by a body of water or other environment that could be affected.

Sunbrella fabric air-dries very quickly.
Machine drying is not permitted.

If fabric has some wrinkling, use an iron, if necessary, but only on the synthetic setting. As some irons exceed the recommended temperature on the synthetic setting, test a small inconspicuous area before ironing entire piece.

DO NOT use a steamer or iron set to steam setting.
